THE KEDGE DISSERTATION

Student guide

KEDGE

MSc MARKETING

2025/2026

1. INTRODUCTION

1.1 What is a dissertation?

A dissertation is primarily a **document written by a student** which aims to enable them to **structure their thoughts** in order to give a **reasoned and analytical response to a specific issue**[1]. As such, the dissertation enables the student to educate themselves through research by formulating a precise question and giving it an equally precise answer. This is done by using methodology which produces 'valid' results and developing investigative tools (data collection, analysis, tests). This entails interpretation and discussion of results and enables the student to defend one or more 'arguments/ideas'. It is not a work placement report.
The response given by the student to their issue in the dissertation must be **as thorough as possible** and therefore depends:

- Firstly, on a **literature review** (or literature investigation). The idea here is for the student to gather literature in existing material that deals with their subject, as well as items that may help them come up with hypotheses. A 'good' issue is moreover an issue which lends itself well to a literature review;
- Secondly, on an **empirical study.** Literature rarely gives a full answer to an ad-hoc issue and the student therefore needs to collect **qualitative** and/or **quantitative data** in order to be able to precisely and fully respond to the dissertation issue.

1.2. The place of the Dissertation in the Master's course

The Master's Dissertation is work which takes place during the cycle of the Master's course for most of the programmes in M2. The Dissertation is done **individually***. For M2, at the Kedge BS campuses - the student must defend their Master's Dissertation before a **panel consisting of their dissertation tutor, possibly a second academic member** of the panel invited by the tutor and a professional tutor interested in the dissertation subject if they wish. The **minimum pass mark** for the Master's Dissertation is **10/20** to allow the student to complete their course of studies. The number of credits allocated to the dissertation varies according to the programme.

1.3. Who is this document for?

This document is for all students as a dissertation guide to help with the challenges faced in this work. It guides the student **in their work on the dissertation** and should help them to progress with their work. All students will be able to refer to it to understand the nature, challenges and processes of the dissertation.

2. PROCESSES IN THE DISSERTATION

2.1. Key stages

The dissertation is to be done **within the time frame indicated by the programme**. **Beyond this date, the student's degree will automatically be deferred if the programme allows.** It is however advised that students begin their consideration the previous year.
The following table shows how the dissertation works and sets out the required stages and recommended times to complete these stages. **There are just three official milestones on the dissertation platform.**

[1] **An issue does not mean a theme** (e.g.: sensory marketing, Islamic finance, employee motivation, etc.) but a real **managerial or theoretical question**.
* Students wishing to work as a pair on a dissertation may do so under certain conditions (see details in appendix 6).

Time indications	Dissertation stage	Content
According to the programme	**1st compulsory milestone** on the platform. **Subject bidding** Choice of subject and tutor for dissertation declaration : *The deadlines are communicated by the programme and can be found on the platform*	**The student states their choice of issue based on the terms indicated by their programme** and seeks a tutor. The student may propose an issue or choose a tutor's subject or theme. The requested tutor may accept or refuse depending on their interest in the subject and their level of expertise. They must respond in no more than 10 days from receiving the subject. **N.B.:** The platform works on a first come first served basis: therefore the first student who chooses a subject given by a tutor will be favoured above students who declare their interest later.
1month	**2nd compulsory milestone*** on the platform. **Research project** *The deadlines are communicated by the programme and can be found on the platform*	**The student has validation from their tutor. It is their responsibility to contact the tutor** to discuss the issue, fine tune the subject if necessary and begin the work. **The student must submit a description of their subject, the main research question and associated challenges, a short description of the methodology envisaged and some key references associated with the subject (10 academic references minimum).** It must be submitted on the platform. If the tutor validates it, the student goes on to the next stage. If the tutor rejects it, the student must correct it and submit it again. *
3 months	Literature review	**The student begins the stage of researching academic works** (articles from scientific journals and works written by researchers) to bring some early elements of theoretical response to the issue. **The tutor gives them guidance** to ensure the literature investigation is as relevant as possible, but without actually giving them the references. This is organised in a plan which it is advisable to submit to the tutor.
15 days	Literature review	**The student has written the theoretical part of their dissertation** in a clear, structured and complete manner. It is advisable to have it approved by the tutor
1 month	Empirical stage	Based on the literature investigation, **the student outlines their methodology for collecting data** to enable them to give a precise and complete answer to their issue. **The tutor gives them guidance** so the collection can be as fruitful as possible.

	Empirical stage	The student proceeds to **data collection and analysis**. The student uses this to begin **writing the empirical part**.
1½ months	Writing	**The student** continues and **finishes writing** their work, with recommendations, conclusion, introduction and summary.

*** Students will not be able to submit milestone 3 until this stage (validated milestone 2) has been validated by the tutor.**

1 month	**3rd compulsory milestone** on the platform. **Submitting the dissertation** Final document *The deadlines are communicated by the programme and can be found on the platform*	The student submits their **final dissertation** to the tutor. **The 3rd milestone** to complete and have approved by the tutor is the **submission of the dissertation**. It must be submitted on the platform but can only be submitted once. It is then automatically tested by the **COMPILATIO anti-plagiarism software**. The tutor receives the report and assesses it.
20 days	**Defence** (compulsory stage on some programmes and courses)	The student **defends their work orally**. The date is agreed with the tutor via the platform. The tutor's assessment is saved on the platform before the deadline set by the programme

It is important to be aware that **these stages are key to ensure that work on the dissertation advances steadily and in the right direction. The milestones are compulsory and must be observed** by the student. If they are not kept, the student will be contacted by the programme and reminded to observe this schedule or risk **administrative sanction**.
It should be noted that the tutor may give the student guidance but must not do the work for them. It is up to the student to be the driving force and to seek out the tutor when they have specific needs.

2.2. **Literature review**

This **literature review mostly consists of academic works and articles,** as well as potentially research colloquium proceedings. It is understood that what is meant here by an academic article is one from a periodical, otherwise called a scientific journal. It is essential for the literature review to be based on international literature (and not only French). The student can find them:

- At La Ruche Library (Bordeaux) and at the Hub (Marseille)
- On the La Ruche Library portal, in databases such as *Business Source Complete*, *Sciencedirect*, *Sage* or *Emerald*;
- On www.scholar.google.com.

It is recommended that students use all 3 sources to maximise their chances of finding academic articles that are essential to their work. Moreover, the quality of the journals will be key when it comes to assessing the Dissertation; **it is therefore up to the student to select the best sources** in consultation with their tutor, whether they are written in French or another language[2].
Online documents whose validity could be questioned **are to be avoided**.
The purpose of the data analysis training is to show students how to best collect and analyse **qualitative or quantitative** data, in order to address their issue. These two parts - collection and analysis - are fundamental in order for the empirical stage to be profitable and give a valid response to the question.

3. THE FINAL DOCUMENT AND ITS DEFENCE

3.1. Form and submission of document

The dissertation may be written in French or English. Considering the definition of the dissertation and its structure, the number of pages will be communicated by the programme but it must contain the following:

- A **cover** stating the student's name, tutor's name, name of the school and programme, academic year, dissertation title, submission date.
- A **table of contents** with page numbers.
- A **body of text** (introduction, literature review + empirical study, conclusion) in the font Times New Roman 12pt with line spacing of 1.5 and left and right margins of 2.5cm.
- A full **bibliography** complying with APA standards (American Psychological Association) in line with the academic standards (see documents in appendix 3).
- Any **potential appendices**. The documents presented as appendices must not be essential for understanding the body of the text. They are complementary to it and only make sense when linked with it.

A style sheet is provided to students on the platform so as to ensure standardised formatting, enabling students to promote their research work.
Any Dissertation that does not use a professional structure and form in compliance with the academic standards will be sanctioned.
The student may ask that the Dissertation is classed as confidential by the school if featured data must not be known by the general public. An appendix document deals with cases of 'classified' dissertations.
Every Dissertation will be subject to verification by **anti-plagiarism software** (*Compilatio*) to ensure the student has not plagiarised. Any Dissertation showing a level of plagiarism of **over 10% of the Dissertation** or any case of **academic fraud, on confirmation by the tutor,** will not be upheld and the student must face the Disciplinary Board. The student may refer to appendix 2 for a definition of plagiarism and fraud.

3.2. The defence (depending on the programme)

The purpose of this exercise is to demonstrate in-depth knowledge of the subject and **the student's ability to defend their work.** The defence may only take place once the tutor has given their backing. It **can take place remotely (for example via Teams) or face-to-face** at the school, and the time is agreed with the tutor. The document will be delivered prior to this in electronic format via the platform.

The **oral defence before the tutor** (and **potentially a second member** of the panel invited by the tutor) is organised as follows:
- A 20-minute structured presentation of the literature investigation and research results. The student must use a visual aid (PowerPoint, Prezi, etc.).
- The student must answer questions asked by the tutor during a 20 to 30-minute discussion.

[2] To understand what it meant by a periodical, the student may refer to appendix 1 which presents a non-exhaustive and indicative list of periodicals for each of the management disciplines.

The tutor is free to give the student an indicative score, with this score subject to retrospective alignment. This is an overall score consisting of two percentages, one for the assessment of the written work and the other for the defence. The programme will communicate them to you.

3.3. Assessment of the defence.

For reasons of transparency, the student may refer to the scale in appendix 4 to see how they will be assessed.

3.4. Documents available to the student

Besides this dissertation guide, a number of documents are made available to the student on the platform or as an appendix in order to aid their work on the dissertation and help them to promote their work retrospectively:

- The platform user guide.
- A style sheet, designed to help the student in the drafting of their work, the purpose of which is to standardise the presentation and structure (available on the platform);
- A tutorial on 'how to optimise the literature review' produced by KEDGE library, (available on the platform);
- A summary of APA standards, explaining how to quote sources and how to structure the bibliography (see appendix);
- A document about intellectual property rights, outlining restrictions regarding the use of non-academic media (video for example), available on the platform soon;
- Authorisation by the author for the dissertation to be shared electronically which will allow, if needed, for a dissertation to be declared confidential or allow its promotion (online archiving). This document is accompanied by authorisation from the host institution or company for the dissertation to be shared electronically when the field study involves use of data belonging to it. See appendices.
- Sharing forbidden due to classified nature of data (see appendix)

APPENDIX 1: EXAMPLES OF PERIODICALS BY DISCIPLINE

DISCIPLINES	PERIODICALS
Accountancy / Audit	Accounting and Finance Comptabilité Contrôle Audit Finance, Contrôle, Stratégie International Journal of Accounting The Accounting Review
Economics	American Economic Review Economics Bulletin Economic Inquiry Economie et Prévision Public Choice Revue d'Economie Industrielle
Entrepreneurship	Entrepreneurship: Theory and Practice International Small Business Journal Journal of Business Venturing Revue de l'Entrepreneuriat Revue Internationale PME Strategic Entrepreneurship Journal
Human resources management	Employee Relations Human Relations Human Resource Management Journal International Journal of Human Resource Management Journal of Organizational Behavior Personnel Psychology Revue de Gestion des Ressources Humaines
Finance	Finance Finance, Contrôle, Stratégie Journal of Banking and Finance Journal of Finance Revue d'Économie Financière Revue du Financier Revue des Sciences de Gestion
Logistics / Supply Chain	European Journal of Operational Research International Journal of Production Economics International Journal of Production Research Production and Operations Management Quality Management Journal Revue Française de Gestion Industrielle Supply Chain Forum: An International Journal (Kedge journal) Logistique et Management (Kedge journal)
Management / Strategy	Academy of Management Review Finance, Contrôle, Stratégie Journal of Management Management Decision Management Science M@n@gement

	Revue Française de Gestion
Marketing	Décisions Marketing Journal of Business Research Journal of Consumer Psychology Journal of Marketing Journal of Marketing Research Journal of Retailing Recherche et Applications en Marketing
CSR and sustainable development	Academy of Management Review Academy of Management Journal Journal of Management Studies Journal of Business Ethics Business Strategy and the Environment Business Ethics Quarterly Organization & Environment Ecological Economics

NB: By presenting 5 to 7 periodical titles per discipline, this list is not exhaustive but its sole purpose is to show the student what is meant by 'periodical' or 'academic / scientific journal'. For the same reasons, some components of the disciplines are not represented.

APPENDIX 2: PLAGIARISM AND FRAUD

Dissertation submission (milestone 3): it may only be submitted one time and an COMPILATIO analysis is automatically run. The tutor receives a report which they can then assess.

Use of references and quotes is a sign of academic diligence. The use of another person or institution's ideas or words must be explicitly signalled: by a reference in the first instance and by a quotation in the second. It is important to do this clearly and explicitly in order to make it easier to search for documents, in compliance with APA standards which form the benchmark in social sciences. If this is not done, it is considered to be plagiarism. **Plagiarism is a serious professional offence.**

Specifically, plagiarism is taking something from an author and unjustifiably claiming it as one's own by copying, imitating or misusing it, in part or in whole.

A student has committed an act of fraud when they:

- Take credit for work, written or oral, of which they are not the author (in whole or in part), by omitting any cited reference to the author or holder of the work;
- Present falsified or fabricated data of any kind;
- Assume the identity of an author by taking credit for the content and/or the medium without making explicit mention of it;
- Claim ownership of the creative work of another by presenting it as their own;
- Take text extracts, images, data, etc. from external sources and use them in their own work without mentioning the origin;
- Summarise an author's original idea by expressing it in their own words but do not cite the source;
- Cheat in an academic assessment.

Plagiarism applies to:

- An academic article or work;
- An exercise or case study;
- A study or report;
- A dissertation or thesis;
- Any document of which the student is not the author but claims as their own.

Sanctions:

A student who has committed academic fraud, or who has participated in such actions, will be sanctioned by the Professor. The Professor has the authority to impose the first two levels of sanctions mentioned below. The Professor must submit a sanction report to the program to which the plagiarist belongs.

The student will be informed and/or summoned by the Program Director or their representative for a preliminary hearing prior to a possible summons before the Disciplinary Committee of Kedge Business School, which may decide on the application of third and fourth level sanctions.

The student has an individual and exclusive responsibility for the content included in their thesis. In this context, any plagiarism or reporting of erroneous information recognized as academic fraud will result in sanctions.
The thesis supervisor may, if deemed necessary and in consultation with the Thesis Lab and the relevant program director, refer the case to the disciplinary committee. **Every thesis must be the result of the**

student's personal work, and it is strictly forbidden to delegate all or spread out part of its writing to any third party (whether human or not).

The Compilatio tool measures anti-plagiarism by similarity rates. As a guideline, the following rules are applied (1st and 2nd category):

Category 1: 10% to 20% = The supervisor will determine whether the work needs to be revised to meet expectations, explicitly considering the given deadlines and the stages of work with the tutor. The supervisor may also decide that, given the nature of the plagiarism and despite a lower rate, the student is subject to disciplinary committee review.
Category 2: 20% or more, automatically subjects the student to = 0/20 + deferment of diploma + a potential summons to the disciplinary committee, which may result in:

1. A reprimand recorded in the student's academic file, precluding any leniency for potential graduation;
2. Temporary exclusion from the program for a period of one to two semesters;
3. Permanent exclusion from the program.

Compilatio also indicates the rate of AI usage. Here are best practices:

Category 1: AI up to 10%: There is tolerance even though the supervisor must analyze the nature of the percentage. Generally acceptable if it includes the use of AI tools for simple tasks such as grammatical correction, synonym suggestions, or generating titles and subtitles.

Category 2: AI from 10% to 30%: May require further examination. At this level, AI might be used to structure ideas or suggest references, but the majority of the work must remain original and be performed by the student. If AI starts having a significant influence on the content, i.e., the originality and personal contribution of the student can be questioned, the supervisor must decide whether to allow the student an opportunity to correct and reduce it to acceptable levels or to request, based on qualitative elements, referral to the disciplinary committee.

Category 3: AI usage of 30% or more: Considered as fraud. When AI generates substantial parts of the text without proper source acknowledgment, analysis, or conclusions, rather than aiding formulation, the work no longer reflects the student's intellectual effort. The student is subject to disciplinary sanctions and deferment of the diploma.

NB: A known act of plagiarism at a partner institution may lead to the application of these sanctions set out in Kedge Business School’s regulations notwithstanding the partner’s decision.

APPENDIX 3: EXAMPLE OF 'APA' FORMAT BIBLIOGRAPHY

A bibliography should allow the reader to quickly understand, in a transparent manner, the sources used by the author when writing their Dissertation. Consequently, the bibliography must comply with certain standards. The bibliography format is therefore as follows. This one does not have to be followed exactly but must at least contain the following information and be presented as follows:

1. Surname and initials or first name of the author(s),
2. Year of publication
3. Title of article or chapter (if chapter, in italics),
4. Publication title (in italics),
5. Volume, Journal number and Pages of the article.
6. Publisher if there is one (for a book).

Google Scholar's 'cite' function will make the student's task easier.
It is important to present the authors in alphabetical order to make it easier for the reader to verify the sources.

Examples

- Article in a journal

Holmqvist, J., & Grönroos, C. (2012). How does language matter for services? Challenges and propositions for service research. *Journal of Service Research*, 1094670512441997.

- Book

Karyotis, C., & Nekhili, M. (2008). *Stratégies bancaires internationales*. Économica, Paris.

- Chapter in a book

Faugere C., & Bouzdine-Chameeva, T. (2013), Œnotourism : Bordeaux face à cinq autres capitales mondiales du vin, in J-F Trinquecoste (eds): Le Vin et ses Marché: Annales 2013, Edition Dareios – Pearson.

- Institution and website:

Commissariat à l'Énergie Atomique, La masse critique, in L'énergie nucléaire : de la fusion à la fission, 2001, [retrieved on 29/10/2003], URL address: http://www.cea.fr/fr/pedagogie/ FusFis/Masse.htm

- By same author, same year (add -a and -b)

Chandon, P., & Wansink, B. (2007a). The biasing health halos of fast-food restaurant health claims: lower calorie estimates and higher side-dish consumption intentions. *Journal of Consumer Research*, *34*(3), 301-314.

Chandon, P., & Wansink, B. (2007b). Is obesity caused by calorie underestimation? A psychophysical model of meal size estimation. *Journal of Marketing Research*, *44*(1), 84-99.

APPENDIX 4: ASSESSMENT SCALE

Dissertation assessment scale

Student:

Tutor:

FORM	Very weak	Weak	Average	Quite good	Very good	Excellent
Spelling and grammar quality						
Style, clarity						
Observance of presentation standards						
Relationship with tutor and professionalism						
	6	10	12	14	16	20

COMMENTS:	**SCORE / 20 (30% written score)** _____

CONTENT	Very weak	Weak	Average	Quite good	Very good	Excellent
Formulation and relevance of issue						
Clarity of dissertation objectives						
Quality of literature review						
Quality of conceptual developments						
Quality of method						
Quality and appropriate nature of analysis						
Relevance of recommendations						
	6	10	12	14	16	20

COMMENTS:	**SCORE / 20 (70% written score)** _____

	'Dissertation' score /20 _____

ORAL DEFENCE						
	Very weak	Weak	Average	Quite good	Very good	Excellent
Quality of slides						
Quality / originality of proposed plan						
Clarity of delivery						
Observance of time limit (15 to 20 minutes)						
Quality of information provided						
Ability to support recommendations						
Ability to correctly answer questions						
	6	10	12	14	16	20

COMMENTS:	**'Defence' score** / 20 _____

Score 'Dissertation' (written) **/ 20 * XX%**	**+**	Score 'Defence' (oral) **/20 * XX%**	**=**	**FINAL SCORE** **/20**

APPENDIX 5: ACCESS TO DISSERTATION PLATFORM

All students undertaking the dissertation will have access to the dissertation platform.

This is the 'subject bidding' period which lasts **several weeks.**
In all cases, every student will need to find a tutor and a subject.

Reminder of the working principle:

- **The student states their choice of issue based on the terms indicated by their programme** and is allocated a tutor. The student may propose an issue or choose a tutor's subject or theme.
- The requested tutor may accept or refuse depending on their interest in the subject and their level of expertise. They must respond no later than 10 days from receiving the subject, otherwise the request is cancelled. The student may also cancel their request.

N.B.: The platform works on a first come first served basis: therefore the first student who chooses a subject given by a tutor will be favoured above students who declare their interest later. In the same way, if the student has made multiple requests, the acceptance of one of them will overrule and invalidate all the others.

Access to the platform: http://memoires.kedgebs.com
Your username and password are the same as used on the virtual campus

If you have any difficulties accessing it, please contact IT Support (https://mydesk.kedgebs.com/s/kedge_fr)

Once you have been allocated a tutor they will answer your questions about the dissertation work.

For any other questions, your programme will provide you with the relevant email address.

APPENDIX 6

Students are allowed to work in pairs on a dissertation. There are several advantages to working as a team (if agreed in advance by the programme):

- On an educational level
    - Learning about co-construction of a research project
    - Synergy of expertise and sharing of areas of interest
    - In-depth work as a team for data collection and analysis
    - Possibility to approach the same issue with two complementary viewpoints
    - Possibility to go further: literature review, field study, summary

- For the students
    - Possibility to discuss and challenge the approaches and conclusions
    - Enriching each student's reflection
    - Benefiting from each other's experience and the views that will have developed thanks to the experiences: work experience, international, etc...

In terms of the processes, students working in a pair on a dissertation:

- must obtain prior approval from the tutor confirming that working as a pair is appropriate
- will have to certify that they have contributed equally to work on the dissertation. This will be in the form of a note on the first page of the dissertation: 'The two authors of this dissertation do solemnly swear to have contributed equally to the result presented in this document'
- Each student registers individually on the platform and those wishing to do a dissertation as a pair must ask the tutor to identify them as a pair on the platform. Among other things this will allow them to submit milestone 2 and 3 just once.

Having agreed for two students to work together on a dissertation, the tutor must:

- Ensure that the subject is appropriate to be undertaken by two students
- Verify each student's contribution (and, if necessary, allocate a separate score according to their assessment of each student's contribution)
- Group students via the platform

APPENDIX 7 DOCUMENTS RELATED TO SUBMITTING THE DISSERTATION
(to attach as an appendix to your dissertation)

AUTHOR	DISSERTATION
SURNAME: **F**irst name: **D**OB: PROGRAMME:	TITLE: Dissertation supervisor: Date of defence (if applicable): SCORE:
CONFIDENTIAL **yes/no** **AUTHOR'S AUTHORISATION TO SHARE** **yes/no** **PANEL'S AUTHORISATION TO SHARE** **yes/no**	

AUTHOR'S AUTHORISATION TO SHARE ELECTRONICALLY

I, the undersigned, (Student Surname/First name)

In the absence of any coercion and in the knowledge that besides the obligation to submit my work on the *'NAME'* platform, I am free to decide whether or not to allow it to be shared online,

I GIVE AUTHORISATION **I DO NOT GIVE AUTHORISATION**

For KEDGE BUSINESS SCHOOL to immediately, or after a period of 10 years (in case of a confidential dissertation) for the whole protection of copyright legal period, share my dissertation online with no time limitation with respect to my intellectual property rights.

I am aware that:

- ✓ Although the Dissertation is intended for publication online, KEDGE BUSINESS SCHOOL is free to choose the open archive platform(s) and whether or not to share the Dissertation based on the panel's agreement;
- ✓ I will be able to withdraw my authorisation for sharing online at any time by sending a letter or email to the department concerned;
- ✓ I freely and non-exclusively hand over the ownership rights to the dissertation. In the absence or withdrawal of authorisation for sharing online, the dissertation may be kept on the document portal of KEDGE BUSINESS SCHOOL's libraries and be available for loan between libraries. This communication will be subject to a 10-year moratorium for confidential dissertations.

Signed in , on / / **Student signature**:
(Preceded by a note saying 'Signed as agreed')

*to be produced individually in case of a pair.

APPENDIX 8 AUTHORISATION FOR ELECTRONIC SHARING

FROM THE HOST INSTITUTION OR COMPANY

(to attach as an appendix to your dissertation if needed)

To complete only in case of a dissertation connected to a company

I, the undersigned, *(Surname/First name)* holding the role of *(Role)*
at the institution or company *(Corporate name)*

AUTHORISE the use of information concerning the company/institution. The dissertation may be shared on the document portal of KEDGE BUSINESS SCHOOL's libraries and may be uploaded to one or more open archive platforms with the panel's authorisation.

I DO NOT AUTHORISE the sharing of information concerning the company/institution due to its confidential nature. I am aware that this suspension of authorisation will automatically expire after 10 years.

This use is intended for the end-of-studies dissertation by *(Student's Surname/First name)* titled *(Dissertation title).*

Signed in , on / /

Company stamp: Work placement mentor/company tutor signature: Student signature

APPENDIX 9 BAN ON ELECTRONIC SHARING

FROM THE HOST INSTITUTION OR COMPANY

'CLASSIFIED'

(to attach as an appendix to your dissertation if needed)

Only to be completed on request of the company whose activity is classified.

I, the undersigned, *(Surname/First name)* holding the role of *(Role)*

at the institution or company *(Corporate name)*

I DO NOT AUTHORISE the sharing of information concerning the company/institution due to its confidential nature.

This ban applies to the end-of-studies dissertation by *(Student's Surname/First name)* titled *(Dissertation title).*

The student will therefore upload this duly signed document in place of the dissertation (milestone 3). In order to assess the work in a confidential manner (written and oral), the tutor may travel to the Company site*.

Signature of Programme Management + school stamp

Signed in , on / /

Signed in , on / /

Company stamp: Work placement mentor/company tutor signature: Student signature

**see conditions in the tutor guide.*
